DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 (having received an action on the merits in 09/413,546 and 10/212,885), drawn to a throttle device with return and default springs, classified in class 123, subclass 396.
- II. Claims 9-12 (now patented, see 6,418,908), drawn to a throttle body with a motor terminal port, classified in class 123, subclass 399.
- III. Claim 13 (now patented, see 6,382,181), drawn to a throttle device with a motor case, classified in class 123, subclass 399.
- IV. Claims 14-17 (now patented, see 6,382,180), drawn to a throttle device with air leak filler, classified in class 123, subclass 399.
- V. Claim 18, drawn to a throttle device with an electromagnetic wire shield, classified in class 123, subclass 399.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I through V may be used alone. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3747

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
